(54) Title: GAME TABLE ASSEMBLY AND METHOD UTILIZING INTERLOCKING STACKABLE FRAME MEMBERS

(57) Abstract: Game table (10) includes four upstanding legs (12) that mount a plurality of construction panels referred to as side panels or end panels. First end panels (14) and first side panels (16) extend between pairs of adjacent legs (12) to surround and define a play area (17). End brace (19) and side brace (20) help to stabilize the game table. Each leg (12) includes a pair of arcuate webs (64, 65) having a C-shaped slideway (66, 67) at opposite leg edge portions (68, 69) oriented at an angle with respect to one another. Floor (15) is supported by the upper edges of second end panels (24) and second side panels (26) to provide the playing surface for game table (10). End panels (14) and side panels (16) are then mounted to legs (12) by inserting respective ribs (75) of panel sections (34, 35, 46, 47) in slideways (66, 67).
